

SKAPTO CONSULTING

DIAMOND EXPLORATION & MINING SERVICES

ABOUT US

Skapto is a team of mining specialists that provides geological consulting, exploration and mine management services to the diamond exploration and mining industry.

We have experience with all stages of a mining project, from greenfield exploration to development and on to production.

Skapto specialises in managing exploration and mining projects world-wide, often in remote and difficult circumstances, tailored to the diamond sector.

We offer similar services for gold, base metals and industrial minerals projects.

SERVICES OVERVIEW

Exploration & Mine
Management

Project Due Diligence
& Valuation

Artisanal and Small-Scale
Mine Auditing, Training
and Consulting

Mine Planning and
Process Plant Design

Deposit modelling,
Resource Estimation,
Feasibility Studies

Target Generation
and Prospectivity
Modelling

Mapping, GIS &
Remote Sensing

Sampling and Drilling,
Kimberlite Petrology,
Analysis of Microdiamonds
and Indicator Minerals

CONSULTING SERVICES

Skapto advises its clients on new project selection and acquisition and we help existing diamond mines to improve their operations with audits, evaluations and advise. Our services include:

- Technical and Financial Due Diligence
- Cost Control and Production Efficiency Evaluation
- Project Appraisals and Valuations
- Deposit Modelling & Resource Estimations
- Scoping and Feasibility Studies
- Financial and Investment Analysis
- Environmental, Social and Corporate Governance
- Diamond Traceability

EXPLORATION SERVICES

Diamond exploration requires specific sampling and evaluation methods. Based on our experience with the kimberlites and alluvial diamond deposits of Angola, DRC, Namibia and West-Africa, we offer turn-key diamond exploration services:

- Project Design, Implementation & Management
- Data Compilation & Review
- Structural and Geological Mapping
- Remote Sensing and Geophysics
- Sampling and Drilling Programs
- Kimberlite Petrology, Microdiamond and Indicator Mineral Analysis
- Logistics & Camp Management

MINING SERVICES

Cost control and efficient earth moving and ore processing are essential for a profitable diamond mining project. Skapto has extensive experience with developing and managing industrial and semi-industrial diamond mines, especially in Africa. Our expertise covers:

- Construction and Commissioning
- Mine Management
- Process Plant Design
- Earth Moving Equipment Selection
- Earth Moving Optimization and Cost Control
- Dredging Methods
- Mine Planning
- Health & Safety and ESG Implementation

ARTISANAL & SMALL- SCALE MINING

Skapto has 25 years of experience with tailormade support for responsible artisanal and small-scale mining (ASM) and semi-industrial diamond projects, including:

- Auditing and Evaluation
- Geological, Technical and Financial Consultancy, Training and Courses
- Management Support
- Implementing Environmental, Social and Corporate Governance Procedures for ASM projects
- Diamond Traceability Solutions
- We offer similar services for ASM gold, cobalt, tin and coltan projects.

EXPERIENCE

A map of the African continent is shown in the background, with several countries highlighted in a darker blue color to indicate areas of exploration. These countries include Mali, Namibia, Sierra Leone, Liberia, Guinea, DRC, Angola, and South Sudan. The text of the table is overlaid on the map.

Mali	Kimberlite Exploration
Namibia	Marine Placer Evaluation
Sierra Leone	Alluvial & Kimberlite Exploration
Liberia	Marine Placer Exploration
Guinea	Alluvial & Kimberlite Exploration, Mining
DRC	Alluvial & Kimberlite Exploration, Mining
Angola	Alluvial & Kimberlite Exploration, Mining
South Sudan	Alluvial Exploration
